Subject Index

Adsorption of bacteriophage by filters, 239
Aeration apparatus, calibration of laboratory, 102
Aerobes and sulfate-reducing bacteria in deterioration, 117, 121
Aerosol samplers, bacterial, 337, 349, 355
Agitation-aeration in submerged fermentation, 51, 57
Algicides for swimming pools, 205
All-glass impinger, evaluation of the, 337
Amylase of *Clostridium acetobutylicum*, adsorption of the, 135
Amylolytic enzymes, production of, in media, 212
Anaerobe, irradiation-heat processing of beef inoculated with, 131
Analytical method for calculating heat sterilization times, 256
Analytical microbiology, metabolic response methods in, 180
Antibiotics, screening for, active against intracellular bacteria, 109
Antigenic relationships in *Tetrahymena* strains, 41
Aspergillus niger, location of an esterase in, 115
Assay of thiamine, 309, 311
Assay organisms, preservation of, by direct freezing, 84

Bacillus coagulans, nisin sensitivity of, 289
Bacteria, longevity of, at low temperature, 327
Bacteria, saponin-utilizing rumen, 304
Bacteria, screening for antibiotics active against intracellular, 109
Bacteria, selective enrichment medium for paratyphoid, 63
Bacteria, survival of, in sea water, 388
Bacterial aerosol samplers, 337, 349, 355
Bacterial changes in the rumen in feed-lot bloat, 16
Bacterial destruction of sodium nitrite in open cooling water systems, 292
Bacterial deterioration of emulsion oils, 117, 121
Bacterial growth and fatty acids in cheese, 228
Bacterial spores, reduction of heat resistance of, 166
Bactericides and algicides for swimming pools, 205
Bacteriological quality of frozen meat pies, 320, 324, 327
Bacteriological studies on the mouthpieces of musical instruments, 126
Bacteriophage, adsorption of, by filters, 239
Bacterium, production of flavor in cured meat by a bacterium, 81
Beef inoculated with spores of a putrefactive anaerobe, 131
Biological conversion of light energy to chemical energy of methane, 219
Biosynthesis of tetracycline, chlorination inhibitors in, 149
Blakeslea trispora, β-carotene production by, 94

Calibration of laboratory aeration apparatus, 102
Carbohydrate, effect of, on toxin production by *Clostridium botulinum*, 372
Carotenoids, microbiological production of 94, 98
β-Carotene, effect of lipids and related substances on production of, 98
β-Carotene production by mated strains of *Blakeslea trispora*, 94
Cattle, bacterial changes in the rumen and *Peptostreptococcus elsdenii* n. sp., 16
Cattle, saponin-utilizing bacteria from the rumen of, 304
Cheese, fatty acids and *Clostridium botulinum* in aged, 228
Cheese, inhibition of *Clostridium botulinum* and molds in surface-ripened, 33
Chemistry and microbiology of forage-crop silage, 362
Chicks, toxicity of histamine to, during microbial spoilage, 45
Chlorination inhibitors in biosynthesis of tetracycline, 149
Chlorine-inactivated *Escherichia coli*, reactivation of, 67
Chlorine sensitivity and growth of *Escherichia coli*, 71
β-Chloroethylamines, mutagenic effects of, 202
Clostridia, stability of, held in continuous culture, 29
Clostridium acetobutylicum, adsorption of the amylase of, 135
Clostridium botulinum in cheese, fatty acids and inhibition of, 228
Clostridium botulinum, inhibition of, and molds in surface-ripened cheese, 33
Clostridium botulinum, physiology of toxin production by, 372, 374
Clostridium botulinum, properties of a subtilin resistant strain of, 285
Coliforms and enterococci, longevity studies of, at low temperatures, 327
Coliforms, estimation of, in ice cream by membrane filter, 196
Composting, determination of completion of, 271
Continuous culture, stability of *Clostridia* held in, 29
Continuous recording nephelometer, construction of, 173
Cured meat, production of flavor by a bacterium in, 81
Curvularia lunata, transformation of 11-deoxy-17α-hydroxycorticosterone to hydrocortisone with, 276

11-Deoxy-17α-hydroxycorticosterone, transformation of, to hydrocortisone with *Curvularia lunata*, 276
Direct freezing, preservation of assay organisms by, 84
Dispersing agents, organic salts of sulfonic acids as, in microbiology, 105
Dyes, toxicity of, to wood-destroying fungi, 145

Emulsion oils, bacterial deterioration of, 117, 121
Enteric bacteria, primary plating medium for differentiating, 314
Enterococci, identification of, from frozen meat pies, 324
Enterococci, longevity studies of, at low temperatures, 327
Enzymes in isolation and analysis of polysaccharides, 378
Enzymes, production of amylolytic, in media, 212
Escherichia coli, growth conditions on chlorine sensitivity of, 71
Escherichia coli, reactivation of chlorine-inactivated, 67
Esterase in *Aspergillus niger*, 115

Factors involved in the control of microbial deterioration, 368
Fatty acid salts of tetradecylamine, microbiological activity of, 248
Fatty acids and inhibition of *Clostridium botulinum* in aged cheese, 228
Fatty oils in penicillin fermentation, 176
Feed spoilage, studies in, 329
Fermentation, agitation-aeration in submerged, 51, 57
Fermentation, production of gibberellic acid by, 301
Filters, adsorption of bacteriophage by, 239
Flavor in cured meat by a bacterium, 81
Food, rapid test for detecting *Staphylococcus aureus* in, 22
Foods, irradiation-heat processing of canned, 131
Forage-crop silage, microbiology and chemistry of, 362
Fumaric acid, production of, by *Rhizopus arrhizus*, 74
Fungi, toxicity of dyes to wood-destroying, 145

Gamma radiation, inhibition of mold growth by, 329

Gibberellic acid, production of, by fermentation, 301
Grains and production of *beta*-carotene by mated strains of *Blakeslea trispora*, 94
Grape juice, growth of yeasts in, stored at low temperatures, 1, 7, 12
Growth conditions and chlorine sensitivity of *Escherichia coli*, 71
Growth factors in medium for paratyphoid bacteria, 63

Heat resistance of bacterial spores, reduction of, 166
Heat sterilization times, analytical method for calculating, 256
Histamine formed during microbial spoilage of tuna, toxicity to chicks, 45
Hydrazoic acid, technique for use of, as inhibitive agent, 113
Hydrocarbon oxidizing microbes in soils, areal contrasts in, 156
Hydrocortisone, transformation of 11-deoxy-17α-hydroxycorticosterone to, with *Curvularia lunata*, 276

Ice cream, estimation of coliforms in, by membrane filter method, 196
Inhibitive agent, technique for use of sodium azide as, 113
Inhibitory factors in medium for paratyphoid bacteria, 63
Intracellular bacteria, screening for antibiotics active against, 109
Irradiation-heat processing of canned foods, 131

Kloeckera brevis, plate assay of thiamine using, 309

Laboratory aeration apparatus, calibration of, 102
Lactobacillus fermenti, plate assay of thiamine using, 311
Lactobacillus which synthesizes a polysaccharide from sucrose, 138
Light energy, biological conversion of, to chemical energy of methane, 219
Lipids and related substances on production of *beta*-carotene, 98
Longevity studies of coliforms and enterococci at low temperature, 327

Maple sirup, effect of zinc on microorganisms in, 152
Mass-culturing and mutagenic treatment of microorganisms, 334
Meat curing, microbiology of, 138
Meat pies, bacteriological quality of commercially frozen, 320, 324, 327
Meat, production of flavor by a bacterium in cured, 81
Medium, primary plating, for differentiating *Proteus*, 314
Medium, selective, for paratyphoid bacteria, 63
Membrane filter, estimation of coliforms in ice cream by, 196
Metabolic response methods in analytical microbiology, 180
Methane, biological conversion of light energy to chemical energy of, 219
Method for rupturing large quantities of microorganisms, 318
Microbial amylases, production of, in media, 212
Microbial deterioration, factors in control of, 368
Microbial spoilage of tuna, histamine formed during, toxicity to chicks, 45
Microbiological activity of fatty acid salts of tetradecylamine, 248
Microbiological assay organisms, preservation of, by direct freezing, 84
Microbiological production of carotenoids, 94, 98
Microbiology and chemistry of forage-crop silage, 362
Microbiology of meat curing, 138
Microorganisms, effect of zinc on, in maple sirup, 152
Microorganisms in soil, hydrocarbon oxidizing, 156
Microorganisms, mutagenic and mass-culturing of, 334
Microorganisms of freeze-damaged oranges of various acidities and heat resistance, 193
Microorganisms, rupturing large quantities of, 318
Mold growth, inhibition of, by gamma radiation, 329
Mouthpieces of musical instruments, bacteriological studies on the, 126
Musical instruments, bacteriological studies on the mouthpieces of, 126
Mutagenic effect of β-chloroethylamines, 202
Mutagenic treatment and mass-culturing of microorganisms, 334
Mutants of *Torulopsis utilis* var. *major*, chemical analysis of, 38
Mutation, "petite colonie," in an alcohol distillery yeast, 27

Nephelometer, construction of continuous recording, 173
Nisin sensitivity of *Bacillus coagulans*, 289
Nocardiae, sporulation by some strains of, 89

Oils in penicillin fermentation, 176
Oranges, microorganisms from freeze-damaged, 193
Organic salts of sulfonic acids as dispersing agents in microbiology, 105
Oxygen absorption in a fermentor, solid disperse phase on, 57
Oxygen, polarographic measurement of, in yeast fermentations, 235

Paratyphoid bacteria, selective enrichment medium for, 63
Penicillin fermentation, fatty oils as energy source in, 176
Penicillium chrysogenum, mutagenic treatment and mass-culturing of, 334
Peptostreptococcus elsdenii, n. sp., during feed-lot bloat in the rumen, 16
"Petite colonie" mutation in an alcohol distillery yeast, 27
pH, effect of, on toxin production by *Clostridium botulinum*, 374
Physiological properties in *Streptomyces rimosus*, 141
Physiology of toxin production by *Clostridium botulinum*, 372, 374
Plate assay of thiamine, 309, 311
Polarographic measurement of oxygen in yeast fermentations, 235
Polarographic measurement of oxygen solution rates in fermentors, 51
Polysaccharides, enzymes in isolation and analysis of, 378
Poultry, yeasts from, and effect on growth by tetracyclines 251
Preservation of microbiological assay organisms by direct freezing, 84
Primary plating medium for differentiating *Proteus*, 314
Principles in the design of continuous sterilizers, 264
Production of fumaric acid by *Rhizopus arrhizus*, 74
β-Propiolactone vapor, virucidal activity on Venezuelan equine encephalomyelitis virus, 199
Proteus, primary plating medium for differentiating, 314
Putrefactive anaerobe, beef inoculated with spores of a, 131

Rapid test for detecting *Staphylococcus aureus* in food, 22
Reactivation of chlorine-inactivated *Escherichia coli*, 67
Reduction of heat resistance of bacterial spores, 166
Rhizopus arrhizus, production of fumaric acid by, 74
Rumen, bacterial changes in the, during feed-lot bloat, 16
Rumen, saponin-utilizing bacteria from, 304
Rupturing large quantities of microorganisms, 318

Samplers, bacterial aerosol, 337, 349, 355

Samplers, comparison of liquid impinger, 355
Saponin-utilizing rumen bacteria, 304
Screening for antibiotics active against intracellular bacteria, 109
Sea water, survival of bacteria in, 388
Shipe sampler, evaluation of the, 349
Silage, chemistry and microbiology of forage-crop, 362
Sodium azide (hydrazoic acid), technique for use of, as inhibitive agent, 113
Sodium nitrite in open cooling water systems, bacterial destruction of, 292
Soils, areal contrasts in hydrocarbon oxidizing microbes in, 156
Solid disperse phase, effect of, on oxygen absorption in fermentors, 57
Spores, reduction of heat resistance of bacterial, 166
Sporulation by some strains of nocardiae and streptomycetes, 89
Stability of *Clostridia* held in continuous culture, 29
Staphylococcus aureus, rapid test for detecting, in food, 22
Sterilization times, analytical method for calculating, 256
Sterilizers, principles in the design of continuous, 264
Streptomyces rimosus, physiological properties in, 141
Streptomycetes, sporulation by some strains of, 89
Studies in feed spoilage, 329
Subtilin resistant strain of *Clostridium botulinum*, properties of a, 285
Sulfate-reducing bacteria and aerobes in deterioration, 117, 121
Sulfite method for measuring oxygen solution rates in fermentors, 51
Sulfonic acids, organic salts of, as dispersing agents in microbiology, 105
Survival of bacteria in sea water, 388
Swimming pools, bactericides and algicides for, 205

Temperature, effect of, on toxin production by *Clostridium botulinum*, 374
Temperature, longevity of bacteria at low, 327
Tetracycline, chlorination inhibitors in biosynthesis of, 149
Tetracyclines, yeasts from poultry and effect on growth by, 251
Tetradecylamine, microbiological activity of fatty acid salts of, 248
Tetrahymena, antigenic relationships in strains of, 41
Thiamine, plate assay of, 309, 311
Torulopsis utilis var. *major*, chemical analysis of x-ray mutants of, 38
Toxicity of dyes to wood-destroying fungi, 145
Toxicity to chicks of histamine during microbial spoilage, 45
Toxin production, physiology of, by *Clostridium botulinum*, 372, 374
Tuna, toxicity to chicks of histamine formed during microbial spoilage of, 45

Venezuelan equine encephalomyelitis virus, virucidal activity of β-propiolactone vapor on, 199
Virucidal activity of β-propiolactone vapor, 199

Water systems, bacterial destruction of sodium nitrite in open cooling, 292

X-ray mutants of *Torulopsis utilis* var. *major*, chemical analysis, 38

Yeast fermentations, polarographic measurement of oxygen in, 235
Yeast growth in commercial operation, 1
Yeast, "petite colonie" mutation in an alcohol distillery, 27
Yeasts and their growth in pure culture at low temperatures, 7
Yeasts from poultry and effect on growth by tetracyclines, 251
Yeasts, growth of, in grape juice stored at low temperature, 1, 7, 12
Yeasts, quantitative studies of natural mixed inocula, 12

Zinc and microbial growth in maple sirup, 152
